

# OCT 4, 11:30- 12:30PM EH-210 CS1 FOR NEWBIES

## Group Tutoring Session

This session is for those students who are taking CMP 128 Computer Science 1 and haven't experienced coding before.

Topics covered could include:

- basic syntax - semi-colons, curly braces, parens, comments
- input/output statements
- variables, memory storage
- data types and declaration statements, literal values and constants, converting data types (implicit and explicit)
- operators, assignment operators, increment and decrement operators.

Or bring your own questions.

**New to  
programming?**

**Struggling with  
learning a new  
language?**

**Ask those  
questions you  
always wanted to  
ask.**

**No question is a  
“dumb” question**

**Led by CCM  
Student Peer  
Tutors  
CCM IT Peer  
Tutoring Center**

**10/4, 11:30-12:30  
EH 210**
