TECHNOLOGY LITERACY COMPETENCY TEST

If you did not take the Technology Literacy Competency test, you may schedule an appointment with the CCM testing center. Before doing so, consult with an Academic Advisor to confirm that your major requires additional testing in this subject matter and/or review the requirements for your major.

To do so, check the Progress tab on Student Planning from your Titan's Direct account. Consult with an academic advisor and/or check the recommendations on your curriculum checksheet for your major.

Score	Score Assessment	Advisement
14 – 20	This is a passing score.	Based on your academic major a technology literacy course may still be required and/or chosen. Check "progress" on Titans Direct/Student Planning, consult with an academic advisor and/or see the curriculum checksheet for details - note that some majors have an embedded technology literacy class.
1 – 13	This is NOT a passing score	Based on your academic major, a technology literacy course may be required. Check "progress" on Titans Direct/Student Planning, consult with an academic advisor and/or see the curriculum checksheet for details - note that some majors have an embedded technology literacy class.

NOTES:

- Certain degree programs require a 1 – 4 credit technology literacy course, regardless of your score.

- Certain degree programs require a 1 – 4 credit technology literacy course if you do not pass the technology literacy competency test.

- Many degree programs have a technology literacy course embedded into the curriculum, and you will be required to take a technology course as part of your major.

- You may retake the Technology Literacy Competency test one week after you have taken the previous test. The fee to take the test is $10.
