Construction Update

Academic Complex Elevators and Third Floor Walkway

In the next coming weeks, the focus will be interior carpentry finish work in the classrooms and lecture halls. The third-floor access walkway steel has been erected on the roof. The crane operation work is complete in both Area 1 and Area 2. There will still be intermittent noise and minor odors throughout the next coming months. We have discovered some hidden conduits under, and within, the first-floor slabs that were not visible in the penetrating radar scans. When this happens, we might temporarily lose power or HVAC control in certain areas unexpectedly. As you would normally do, please reach out to Plant & Maintenance ext. 5500 if you find you have a partial loss of power, or the HVAC system is not acting as you would normally expect. We have been able to restore systems relatively quickly, but the sooner Plant knows the sooner they can get things restored.

Public Safety and Plant are continuing to work daily on updating caution and detour signage as the work shifts within the buildings. If you have any concerns, please call Business & Finance at ext. 5012 and they will direct the questions or concerns to the correct department/person.

To keep informed of the construction progress please check the CCMemo for regular updates. We again thank the campus community for their assistance. The completed project will provide much-needed accessibility (ADA) access to the third floors of Cohen, Sheffield, and DeMare halls with larger elevator cabs and a connection between the buildings' third floors. The third-floor connections will improve circulation and provide additional options for emergency egress. The old elevators and equipment rooms will be converted to fully ADA-compliant gender-neutral (all gender) single-stall restrooms and additional building storage. This project is funded through the College's Chapter 12 appropriation and was approved by Morris County.

Morris County Vocational School Career Technical Education Center

In the next coming weeks, trucks will be moving soil off campus utilizing the Dover Chester entrance and construction entrance/exit in parking lot 9. The section of Parking Lot 9 near the Tennis Court stairs
