

Mikayla Wohltman is an undergraduate student from County College of Morris graduating in December 2020 with her Associates Degree of Fine Arts with a focus in architecture. She has maintained the Dean's List for the past three semesters, and hopes to go to University of Arizona.

Mikayla Wohltman has always been fascinated with the way architecture combines art, science, and math. Also, she loves that this career path affects everybody's everyday lives.

In the future, Mikayla Wohltman wants to apply her skills to residential architecture. Her focuses will be on sustainability without losing any comfort. It will be her top priority that people live lavishly and are unable to notice a difference in the way their house functions.
