

### Criminal Justice

---

#### Associate in Science Degree

The Criminal Justice Program at County College of Morris is a two-year, interdisciplinary program leading to an Associate in Science Degree. It seeks to provide the student with a firm understanding of the nature of crime and deviance, its impact upon society, and society's reaction to criminal and deviant behavior. Through the use of elective courses in specific areas of interest, students receive professional preparation for careers in law enforcement, correctional services, juvenile justice or private security. As the two-year degree is readily transferable, many students choose to go on for further study. Others elect to enter the criminal justice field upon graduation. Students will determine, on consultation with the faculty, the most appropriate option to achieve their objectives.

### Career Opportunities

---

Students have found employment with state, county, and local police departments as well as federal police agencies.

### Workforce Statistics

---

According to recent statistics, graduates can find work in police departments, sheriff offices, juvenile detention facilities, human service organizations and private security companies.

### Scholarship Opportunities

---

Students in the program may apply for the Morris County Police Chief's Scholarship, Morris County Sheriff's Crimestoppers Scholarship, the Criminal Justice Community Service Scholarship, the George Turnbull Scholarship or the Kenneth Tomb Criminal Justice Scholarship.
