

WHAT YOU WILL LEARN

The Industrial Design track offers a diverse and interdisciplinary studio environment where students experience multiple areas of design and their influences within industry, society and profession. Architecture, Interior Design, Industrial Design, Fashion Design and Fashion Merchandising are areas that make up the studio culture in the Design Program at CCM.

The Industrial Design track provides a comprehensive foundation for students transferring to four-year colleges and universities to pursue a Bachelor of Industrial Design (B.I.D.), Bachelor of Science or a Bachelor of Fine Arts in Industrial Design. Contemporary and traditional skillsets acquired at CCM provide the student with immediate opportunities in industry as CAD designers, Industrial Design Assistants or Interns, Production Assistants, and Manufacturing Assistants.

WHY STUDY INDUSTRIAL DESIGN AT CCM?

County College of Morris has designated studio classrooms with state-of-the-art equipment and software available to all design students during their academic studies at CCM. The class size average is 12:1 in the studio; this ratio fosters a mentoring relationship between the student and professor. Studios are supplied with materials and resources that allow extensive opportunities for creative exploration in research and process.
