

Downloading and Installing Certificates (Android)

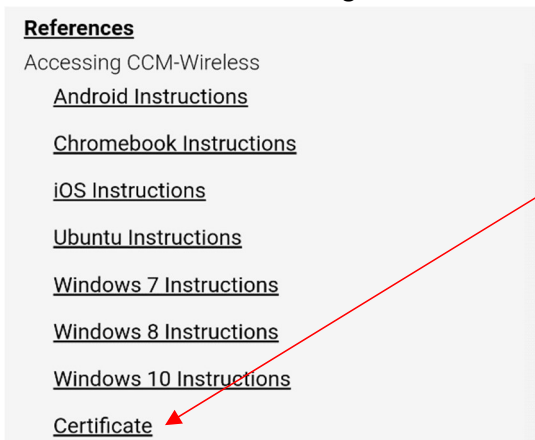

Installing certificates will secure your network traffic.

If your device doesn't have cellular service, please call the Solution Center at 973-328-5600.

1. Open up a browser (Chrome, Samsung Internet Browser, etc.).

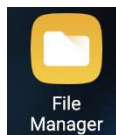

2. Go to the Self Service Portal:
 - a. If you are a CCM Student: Go to <https://www.ccm.edu/ccm-self-service-portal/student-self-service-portal/>
 - b. If you are a CCM faculty or staff member: Go to <https://www.ccm.edu/ccm-self-service-portal/faculty-staff-self-service-portal/>
3. Scroll down to the "Accessing CCM-Wireless" section and tap the Certificate link.

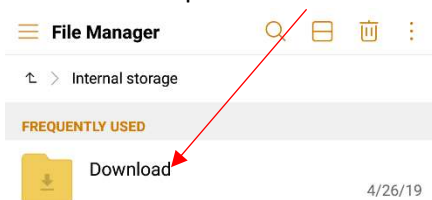

4. The certificate will start to download. When done, tap Open on the downloaded certificate.

5. **If Open is an option, skip to step 9. If not, step 6-8 shows you how to find the certificate.**
6. Install the certificate by navigating to your "File Manager". Below is an example for an LG phone.

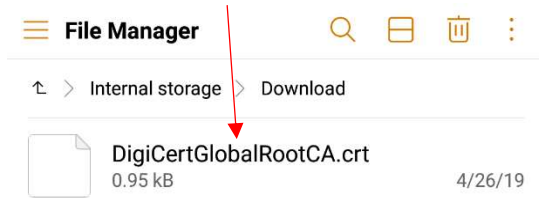

7. Look for and tap the Download folder.

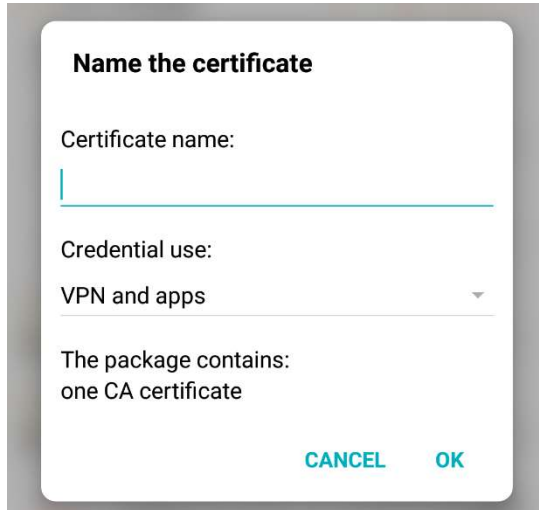

Downloading and Installing Certificates (Android)

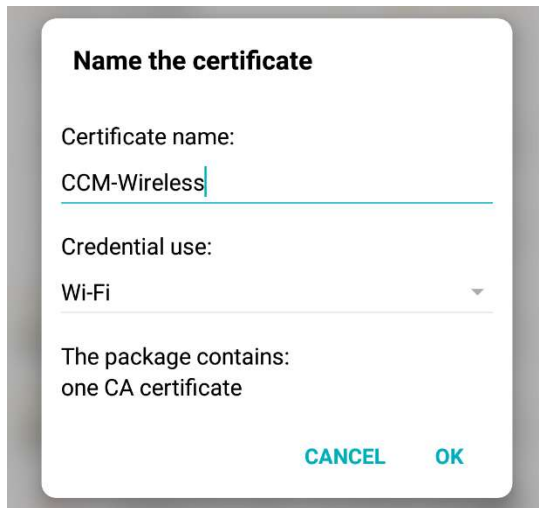

- Click on the certificate to install. The file will end in .crt.

- Your device will prompt you to authenticate with a pattern, pin, password, etc. If this is not set up already, you will need to setup some type of authentication.
- After authenticating, you will need to name and choose the credential use for the certificate.

- Name the certificate CCM-Wireless. **Make sure you choose Wireless for "Credential use"**.

- Tap OK.
- Go back to Wi-Fi settings and continue from step 4 on [Connecting to CCM-Wireless \(Android\)](#) instructions.
