

Hi guys my name is Francisco Agudelo. I'm an industrial design student here at CCM. I'm also a member of an honors society with plans to graduate May 2020. My interest lies in wearable and interactive objects, and my favorite materials are metals , leathers , and glass. I hope to one day have my own design brand just like Steve Madden or Jimmy Choo. In my free time, I enjoy training judo/JiuJitSu, as well as volunteering for immigrant rights. Specifically for Dreamers rights and fighting for equal opportunities in education for all people. So thankful to all the professors at CCM who have made a lasting imprint on me and have taught me many fundamentals for future success.
