Artist Statement

The main focus in my art is to express deeper feelings from within myself. I enjoy creating art that will make the viewer ponder about how it makes them feel. With art, I am able to express myself with lines and brush strokes without any words. When I would create these pieces of art it would help me bond with my emotions and have a better understanding of why I am feeling this way. It also creates a physical token that is symbolic of that part of my life. The art that I create is from an unexplainable feeling that comes from within me, and I put meaning behind every brush stroke I make. It follows me every day of my life and gets translated in my daily activities. I appreciate the hard work and effort into the beautiful things that are created in life and can feel the creator's passion and drive. Art helps me connect and bond with many others as well as have people seek emotions and make their own inferences behind my art.
